CUTTING EDGE SERIES

CHROMALIS PHOTOCHROMIC FRAMES

Inspired by our know-how in optics and light management, Chromalis photochromic frames allow you to **change your look without changing frames.**

The Chromalis frames are transparent indoors, but when exposed to the sunlight the frames change into a translucent dark grey color.

Chromalis photochromic frames are made with innovative lightweight and flexible materials, optimized for comfort.

TECHNO SERIES

THICK RIM

A new technical eyewear concept that **plays with the thickness of a titanium rim, while keeping the frame lightweight**. The thickness of the rim, adorned with distinctive double grooves, allows the mounting of high power lenses while preserving the look of the frame.

All sunglass models belonging to the Thick rim concept feature **Polashade 2 polarized lenses**.
All our sunglasses are **available in prescription**.

TECHNO SERIES

CARBON FIBER

Nikon was the **first brand in the world to pioneer carbon fiber in frames** with the Carbomax range in 1983.

Faithful to this innovative heritage, the new carbon sunglasses boast a very technical construction using **a combination of pure carbon fiber temples and lightweight beta-titanium front**. Last but not least, these premium sunglasses are equipped with our top of the range Polashade Reveal Polarized lenses featuring a color & contrast enhancer.

All sunglass models belonging to the Carbon fiber concept feature the **Polashade Reveal polarized premium lenses**.

All our sunglasses are **available in prescription**.

TECHNO SERIES

SEAMLESS

Optical frames made of a unique sheet of ultra lightweight beta-titanium. The titanium front is not interrupted by any cut through the rim because **there is no rim lock**: the lenses can be inserted using the slits located on each side of the rim. As a result these frames boast a **very sharp and minimalistic look**, effortlessly blending with the lenses for a seamless finish. This premium product is designed for those looking for comfort and refinement.

CORE SERIES

FUNCTIONAL TEXTURES

The functional texture design is created through a complex multi-layer injection technique that combines different camera inspired rubber textures and details: the outside of the temples feature **camera inspired design details** for an identified look, while the inside of the temples feature a **grip texture specially made to improve the fitting and comfort of the frames**.

All sunglass models belonging to the core series feature the **Polashade 2 polarized lenses**.
All our sunglasses are **available in prescription**.
