## CUTTING EDGE SERIES

# CHROMALIS PHOTOCHROMIC FRAMES

Inspired by our know-how in optics and light management, Chromalis photochromic frames allow you to **change your look without changing frames.**

The Chromalis frames are transparent indoors, but when exposed to the sunlight the frames change into a translucent dark grey color.

Chromalis photochromic frames are made with innovative lightweight and flexible materials, optimized for comfort.

# CARBON FIBER

Nikon was the **first brand in the world to pioneer carbon fiber in frames** with the Carbomax range in 1983.

Faithful to this innovative heritage, the new carbon sunglasses boast a very technical construction using **a combination of pure carbon fiber temples and lightweight beta-titanium front**. Last but not least, these premium sunglasses are equipped with our top of the range Polashade Reveal Polarized lenses featuring a color & contrast enhancer.

All sunglass models belonging to the Carbon fiber concept feature the **Polashade Reveal polarized premium lenses**.

All our sunglasses are **available in prescription**.

## TECHNO SERIES

# SEAMLESS

Optical frames made of a unique sheet of ultra lightweight beta-titanium. The titanium front is not interrupted by any cut through the rim because **there is no rim lock**: the lenses can be inserted using the slits located on each side of the rim. As a result these frames boast a **very sharp and minimalistic look**, effortlessly blending with the lenses for a seamless finish. This premium product is designed for those looking for comfort and refinement.
